Projects

[Car Meet Up](#) | Tech Stack: *Python, PostgreSQL, SQL Alchemy, Flask, Jinja, HTML, CSS, JavaScript*

- Developed a full-stack responsive web application using PostgreSQL as a database and SQL Alchemy to access data. Has CRUD operations and user login authentication. Used Google Maps to display markers for meet-up locations. Implemented the Cloudinary API to upload pictures.

[Hmong First Baptist Church](#) | Tech Stack: *ReactJS, Sass*

- Created a responsive single page React web application. Implemented stripe payment gateway for donations. Used JSON file to render data in JSX and react-router for routing.

[Portfolio Website](#) | Tech Stack: *ReactJS, Sass*

- Developed a responsive React portfolio website to display my projects. Implemented framer-motion for smooth page transition. Used props to pass down data, state for functionality, and JSON file to render data in JSX. Used react-router-dom for single page and react icons.
